## Listing of Claims:

Claims 1-20 (*Canceled*)

1        Claim 21. (*Currently Amended*) A method for facilitating recirculation of goods,

2   said method comprising:

3        providing a recirculation website;

4        providing the recirculation website with a homepage with links including

5   BUSINESS, CHARITY, EVERYONE, EVERYONE (CATEGORIES), BROWSE TO GET, FEATURED

6   ITEMS, and URGENT REQUESTS receiving information regarding a good from a donor, the

7   good being chattel property or other physical item;

8        posting information regarding the good on the recirculation website;

9        receiving a request from a recipient for the posted good; and

10        facilitating transfer of the good from the donor to the recipient without any

11   remuneration occurring between the donor and the recipient.

1        Claim 22. (*Previously Presented*) The method according to claim 21, further

2   comprising classifying the recipient within a predefined class and the donor within a

3   predefined class.

1    Claim 23. (*Previously Presented*) The method according to claim 22, further

2    comprising determining whether the predefined class of the recipient is eligible to request

3    the posted good.

1    Claim 24. (*Previously Presented*) The method according to claim 21, further

2    comprising registering recipients on the website and classifying the registered recipients

3    and donors within predefined classes.

1    Claim 25. (*Previously Presented*) The method according to claim 24, further

2    comprising identifying the posted good to recipients of predefined classes previously

3    ineligible to request the posted good after a predetermined period of time in which the

4    posted good remains available for retrieval by a recipient member of a predefined class

5    eligible to request the posted good.

1    Claim 26. (*Previously Presented*) The method according to claim 21, further

2    comprising classifying recipients and donors in a predefined class for charity/non-profit

3    organizations.

1    Claim 27. (*Previously Presented*) The method according to claim 21, further

2    comprising classifying recipients and donors in a predefined class for business/individual

3    entities.

1    Claim 28. (*Previously Presented*) The method according to claim 21, further

2    comprising classifying recipients and donors in a predefined class for any entity.

1    Claim 29. (*Previously Presented*) The method according to claim 21, further

2    comprising soliciting the donor to transfer the posted good to the recipient.

Claim 30 (*Canceled*)

1    Claim 31. (*Currently Amended*) A system facilitating recirculation of goods, said

2    system comprising:

3        a recirculation web server with a processor;

4        a recirculation website associated with the recirculation web server, the

5    recirculation website being a global repository of goods posted for recirculation, and for

6    facilitating recirculation of goods between donors and recipients without any economic

7    remuneration occurring between donors and recipients;

8        recirculation software carried on a computer readable medium;

9      wherein said recirculation software, when executed by the processor, causes the

10     software to carry out steps comprising:

11         providing the recirculation website with a homepage with links including

12     BUSINESS, CHARITY, EVERYONE, EVERYONE (CATEGORIES), BROWSE TO GET, FEATURED

13     ITEMS, and URGENT REQUESTS;

14         receiving information regarding a good from a donor, the good being chattel

15     property or other physical item;

16         posting information regarding the good on the recirculation website;

17         receiving a request from a recipient for the posted good; and

18         facilitating transfer of the good from the donor to the recipient without any

19     remuneration occurring between the donor and the recipient.

1      Claim 32. (*Previously Presented*) The system according to claim 31, wherein said

2      recirculation software further causes the processor to carry out steps comprising

3      classifying the recipient within a predefined class and the donor within a predefined class.

1      Claim 33. (*Previously Presented*) The system according to claim 32, wherein said

2      recirculation software further causes the processor to carry out steps comprising

3      determining whether the predefined class of the recipient is eligible to request the posted

4      good.

1      Claim 34. (*Previously Presented*) The system according to claim 31, wherein said

2    recirculation software further causes the processor to carry out steps comprising

3    registering recipients and donors on the website and classifying the registered recipients

4    and registered donors within predefined classes.

1      Claim 35. (*Previously Presented*) The system according to claim 34, wherein said

2    recirculation software further causes the processor to carry out steps comprising

3    identifying the posted good to recipient donors of predefined classes previously ineligible

4    to request the posted good after a predetermined period of time in which the posted good

5    remains available for retrieval by a recipient member of a predefined class eligible to

6    request the posted good.

1      Claim 36. (*Previously Presented*) The system according to claim 31, wherein said

2    recirculation software further causes the processor to carry out steps comprising

3    classifying recipients and donors in a predefined class for charity/non-profit

4    organizations.

1      Claim 37. (*Previously Presented*) The system according to claim 31, wherein said

2    recirculation software further causes the processor to carry out steps comprising

3    classifying recipients and donors in a predefined class for business/individual entities.

1       Claim 38. (*Previously Presented*) The system according to claim 31, wherein said

2    recirculation software further causes the processor to carry out steps comprising

3    classifying recipients and donors in a predefined class for any entity.

1       Claim 39. (*Previously Presented*) The system according to claim 31, wherein said

2    recirculation software further causes the processor to carry out steps comprising soliciting

3    the donor to transfer the posted good to the recipient.

Claim 40 (*Canceled*)
